University of Huddersfield   54 Kirkham Street

Queensgate, Huddersfield   Oldham

HD1 3DH   OL9 6DU

Dear sir/madam,

I would like to apply for the Learning Technology and Support Assistant placement on ePlacement website. I am attaching my CV, as requested, including my details.

I am a student currently studying Computer Science with Cyber Security. I have recently found this job through my university. I have a passion for the field of IT especially the sector of Cyber Security, this is the reason why I chose my degree as well as I fact that see IT playing a huge part in the future.

I am applying to your company as I have an interest in software development and if accepted this will allow me to apply what I have learnt over the past years into a workplace environment. I have also seen that your company works in a field related to computer security which makes this placement stand out to me more than any of the other placements on offer at this current moment in time. I have a huge passion for computer security and making sure that data is secure so that people cannot be exploited and have their privacy violated.

I feel I would be suitable for this placement; this is because I have had experience in the field of software development producing multiple applications over the past year. This includes commercial restaurant that I work with and the GDSC (Google Developer Student Club) where I am a core member of the team.

I would really look forward to hearing back from your company as it stands out to me compared with the others in the field due to the relation to Cyber Security. I am free for an interview at any time that is suitable and am happy to provide any references or extra information you may require. I sincerely thank you for taking the time out of the day to read through this letter and for considering my application.

Yours faithfully

Khaledur Mahir
